## "Another magnetix™ Miracle"

See the transforming power of intelli-force magnetix™ magnetic flooring.

**Problem:** A 2,100 square foot cafeteria with a fully worn, vinyl asbestos tile floor. Looking at the costs of abatement, the management continued to push off replacing the floor for many years. The employees spent their breaks in a visually uncomfortable environment. This cafeteria is used by hundreds of employees and could not be shut down for any extended period.

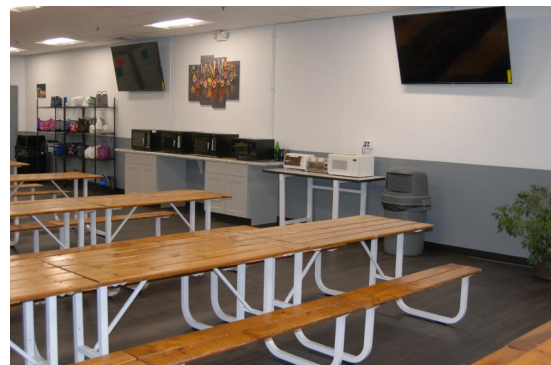

**Solution:** Installation of intelli-force magnetix™ beautiful LVT tile in a large plank format. The existing asbestos floor was isolated by our magnetically receptive floor coating and the new magnetic floor was installed in hours, not days. The employees were back in and were thrilled!

### Before

The old asbestos floor tiles were a constant maintenance problem. No matter how many coats of wax were applied, the floor looked horrible.

### After

The new magnetic LVT planks are no wax and easily maintained by damp mopping. The floor looks amazing!

Want more magnetix? Now you can magnetize your wall surfaces with intelli-force magnetix™ VC Components! Update & upgrade with ease. Check out our YouTube video to learn more!
