Isolate Asbestos with Magnetic Flooring

The safe solution that saves time and money

intelli-force magnetix™ powered by IOBAC, provides a safe, simple way to permanently isolate asbestos flooring without ever having to contend with the complete shutdown of your facility. intelli-force magnetix™ offers you a clean, dustless, odorless installation eliminating environmental and safety issues for the trades, faculty and students. This, all while saving 50% of the cost of traditional methods for installing new flooring and abatement.

www.intelliforcemagnetix.com

No longer do you have to abate asbestos flooring the messy, costly, time-consuming way... NOW there's a better way.

Simply apply intelli-force magnetix™ powered by IOBAC's patented resin over sound asbestos floor for a permanent isolation of asbestos.

Successful Flooring Installation Over Asbestos at Park Ridge Presbyterian Church

Project Spotlight:

Schools and Churches often have old asbestos flooring that becomes problematic and costly to abate. Park Ridge Presbyterian Church chose the quick, cost saving isolation method to replace their flooring with new carpet tiles. Using intelli-force magnetix™ Kwikrez 300+ polyaspartic magnetically receptive coating with IOBAC magnetic resin technology was the solution. Interface carpet tiles with magnetic tabs was the high style finished flooring product. The end result was a successful installation, completed in hours without disturbing existing asbestos flooring or paying the cost for expensive abatement.
